**IMPORTANT – READ THIS FIRST!**

- This model needs to be assembled. Please read the instructions carefully before assembling the model.
- After removing the product from the plastic bag, tear the plastic bag and dispose of it in a safe place, as there is a danger of suffocation if young children mishandle it.
- Carefully remove the parts from the trees and discard the trees after removing all parts.
- Due to the manufacturing process, sharp points may be present that could cause harm. Do not play with or mishandle the trees, and do not use them for anything other than their intended purpose. Households with young children should be particularly cautious.
- Use nippers to remove parts, and smooth any burrs remaining on parts with a craft knife or file. Exercise caution when using nippers, craft knives, or files, as they can cause cuts to hands or fingers. Children under 10 years old should have a parent or guardian carry out the work.
- This kit contains small parts that pose a choking hazard, so keep them out of reach of young children. Never leave a child younger than the target age unsupervised, as there is a risk of swallowing these parts.
- If using plastic cement or paint, pay close attention to the following points: In case of contact with eyes, immediately seek medical attention and follow safety instructions on the product packaging. Do not use cement or paint in enclosed areas due to the risk of inhaling toxic fumes. Never use cement or paint near an open flame, as it poses a fire hazard.
- Avoid leaving this product in areas exposed to direct sunlight, high temperatures, or high humidity.

**PRO TIP!**

Red Sonja's iconic look is defined by her armor and weaponry, which play an important role in her fierce appearance. However, simply adding a metallic layer of paint might leave something to be desired in terms of realism and depth. Here's a tip to have a more realistic metal-like finish:

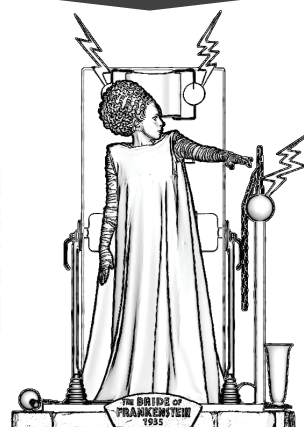

- ① Cover the areas around where you want to paint with masking tape for a cleaner result.
- ② Apply a layer of black under-painting on the areas where you want the metallic effect.
- ③ Finish by painting the area with metallic paint.

Note: Make sure to use glossy black as matte paints will not create the same shiny finish.
